

Current Municipal Development Plan	Proposed Municipal Development Plan
<p><b>Vision Statement</b></p> <p>Olds in 2036</p> <p>It is 2036 and the Town of Olds has surpassed a population of 15,000 residents. Residents appreciate Olds and regard it as a desirable community to call home offering a good balance between economic opportunities and high quality of life. Community facilities, amenities and social opportunities are part of the attraction along with Olds' commitment to environmentally responsible growth.</p> <p>Olds' success as a safe, healthy community in which to live and raise a family is built on inclusiveness and caring. Housing options are abundant and diverse to meet the needs of young families, older families, single person households, students, seniors and renters. Specialized housing assistance is available for those in need along with a broad range of family support services such as child care and access to health care professionals. Amenities are available for youth and the physically active in the form of soccer fields, ball diamonds, community gyms and more. Younger and older residents interact at Olds' library, schools and cultural centre to recreate and enjoy the performing arts. Olds' neighbourhoods meet the needs of many types of households and families and provide many facilities and services near people's homes.</p> <p>Downtown Olds is still a vibrant focal point and identifying feature of the community. Its mixture of uses provides commercial, professional and community services to all residents. A rich stock of historically significant architecture and a welcoming pedestrian environment draw residents and tourists to Downtown Olds and distinguish it from other commercial areas serving the town and surrounding area. Commercial activities and services available in Olds have expanded to feature small scale locally owned businesses and larger national chain outlets in response to residents' needs.</p> <p>There is a broad range of employment opportunities in Olds as new and existing businesses build on the strategic advantages a location in Olds offers within the growing Calgary-Edmonton Corridor. High paying, skilled job opportunities, aided by the mutually beneficial relationship between business and Olds College, enable workers of all ages to find local employment in diverse fields. Value added production and increased availability of a skilled, local workforce supports many businesses and provides both stability and growth in the community. Education and community based learning facilities</p>	<p><b>Vision Statement</b></p> <p>Olds in 2046</p> <p>It is 2046 and the Town of Olds has surpassed a population of 18,000 residents and is now the City of Olds. Olds is known at the Connected City and is the gateway to the connected world. Residents appreciate Olds and regard it as a desirable community to call home offering a good balance between economic opportunities and high quality of life. Community facilities, amenities and social opportunities are part of the attraction along with Olds' commitment to environmentally responsible growth and the creation of a sustainable community. Through its internationally recognized engagement policy, the City of Olds has worked alongside the community to accomplish a multitude of shared goals and achievements.</p> <p>Olds' success as a safe, healthy community in which to live and raise a family is built on inclusiveness and caring. Housing options are abundant and diverse to meet the needs of young families, older families, single person households, students, seniors and renters. <p>enable lifelong learning, foster creativity and knowledge amongst Olds residents.</p> <p>While growth has been encouraged, it has been managed to maintain Olds' small town atmosphere, charm and quality of life. Olds has developed in an environmentally responsible manner. Efficient use of land and mixing of compatible land uses supports pedestrians and cyclists. Natural features are preserved for their function and beauty. Parks and green spaces extend throughout the town and are a well-used and treasured part of the urban landscape. Environmental stewardship is a source of pride for the community as water conservation, composting, recycling and energy conservation have become common practices in everyday life.</p> <p>Connections have also contributed to Olds' success. The major open space and integrated trail system and proximity of housing, jobs and services encourage walking and bicycling. A good roadway system provides connections within and through Olds and links to other communities. Public transportation, walking and bicycling are widely used in addition to private automobiles. Residents and businesses have access to high quality, broadband telecommunication connections to the broader Central Alberta community and the world.</p> <p>Olds residents are proud of the community they live in and have helped build. Well-kept and landscaped boulevards and private yards add to the sense of open space and greenery within the community. Streets are multi-functional and used for sidewalks, benches and landscaping to create attractive streetscapes throughout Olds. The community is well served with municipal infrastructure (roads, water, sanitary sewer, and storm sewer) and protective services (fire, police, ambulance) to meet residents' needs. It is an inclusive community that is accessible to all and encourages members of the community to come together for recreation and social activities. Residents and neighbours look out for one another to foster a safe and secure environment. Future residents are attracted by the qualities of small town living available in Olds.</p>	<p>beneficial relationship between business and Olds College, enable workers of all ages to find local employment in diverse fields. Value added production, building on the rich agricultural possibilities of the region, and increased availability of a skilled, local workforce supports many businesses and provides both stability and growth in the community. The thriving agricultural presence of the Olds Regional Exhibition (ORE) in their southern location add to the employment prospects for Olds. Education and community based learning facilities enable lifelong learning, foster creativity and knowledge amongst Olds residents.</p> <p>While growth has been encouraged, it has been managed to maintain Olds' small town atmosphere, charm and quality of life. Olds has developed in an environmentally responsible manner. Efficient use of land and mixing of compatible land uses supports pedestrians and cyclists. 	<p><b>4.2</b></p> <p><b>Boundaries and Size of Areas for Major Land Uses</b></p>	<p>The boundaries between each major land use category and the relative size of each area shown on the Future Land Use Concept (Map 2) shall not be rigidly interpreted.</p> <p>Where a more detailed plan in the form of an area structure plan or area redevelopment plan is available, the boundaries and areas of specific land uses in these adopted plans shall prevail.</p> <p>Where different Land Use Bylaw Districts have been applied, the boundaries and areas of specific uses of the Districts shall prevail.</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
<p><b>Growth Management</b></p> <p><b>Goals</b></p> <p>To use land and infrastructure efficiently while encouraging a greater mix of land use and socio economic activities in both new and established areas.</p> <p>To identify and secure the land and infrastructure capacity that is required to meet future growth needs.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Ensure an appropriate supply of land and infrastructure is available to accommodate future growth.</li> <li>(b) Encourage growth in locations that can utilize existing or planned infrastructure</li> <li>(c) Work with Mountain View County to identify and protect future growth areas for both municipalities</li> </ul>	<p><b>Growth Management</b></p> <p>Growth management is the process of accommodating changes and growth in the community, while directing the location and pattern of development. It seeks to ensure that the quality of life in Olds is maintained as the size of the community increases. Growth management is also a tool to ensure that development contributes to, and works towards, making the community’s future vision as a sustainable community a reality. A lack of coordinated growth management can lead to land use conflicts and inefficient servicing patterns. This, in turn, can affect the ability of the Town to provide municipal services in a cost effective manner and achieve the optimal use of limited funds for capital improvements and upgrades.</p> <p><b>Goals</b></p> <p>To use land and infrastructure efficiently while encouraging a greater mix of land use and socio economic activities in both new and established areas.</p> <p>To identify and secure the land and infrastructure capacity that is required to meet future growth needs.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Ensure an appropriate supply of land and infrastructure is available to accommodate future growth.</li> <li>(b) Encourage growth in locations that can utilize existing or planned infrastructure capacity and reduce overall travel demands</li> <li>(c) Work with Mountain View County to identify and protect future growth areas for both municipalities.</li> </ul>

Current Municipal Development Plan			Proposed Municipal Development Plan		
5.1	<b>Growth Strategy</b>	The Town shall monitor the growth of the town and update its short-term (up to 5 years) growth strategy on an annual basis and its long-term (5 to 30 years) growth strategy at least every five years.	5.1	<b>Growth Strategy</b>	The Town shall monitor the growth of the town and update its short-term (up to 5 years) growth strategy on an annual basis and its long-term (5 to 30 years) growth strategy at least every five years.
5.2	<b>Relationship with Mountain View County</b>	The Town shall work with Mountain View County to prepare and maintain an up-to-date Intermunicipal Development Plan that identifies and protects the Town's short and long-term growth areas as identified in the Land Use Concept Map while respecting the County's proposed growth areas.	5.2	<b>Relationship with Mountain View County</b>	The Town shall work with Mountain View County to have an up-to-date Intermunicipal Development Plan that identifies and protects the Town's short and long-term growth areas as identified in the Future Land Use Concept (Map 2) while respecting the County's proposed growth areas and land use planning aspirations.
5.3	<b>Efficient Utilization of Infrastructure</b>	The Town shall give priority to the efficient utilization of existing and planned capacity in utility and transportation infrastructure in determining appropriate short-term growth directions.	5.3	<b>Efficient Utilization of Infrastructure</b>	The Town shall give priority to the efficient utilization of existing and planned capacity in utility and transportation infrastructure in determining appropriate short-term growth directions.
5.4	<b>Contiguous Growth</b>	The Town should ensure that new development is contiguous to the existing built-up area. This requirement for contiguous development shall be applied in a manner that maintains a competitive supply of developable land within the Town boundaries.	5.4	<b>Contiguous Growth</b>	<p>The Town should encourage development is contiguous to the existing built-up area and takes advantage of proximity to existing infrastructure.</p> <p>This aim for contiguous development may not always be possible based on the timing for development desired by individual landowners/developers. The desire to encourage contiguous development shall not be applied in a manner that establishes a monopoly over the supply of available serviceable land.</p> <p>A landowner/developer wishing to proceed with development of an area that is not contiguous shall</p>

Current Municipal Development Plan			Proposed Municipal Development Plan		
					be required to bear the full cost of any infrastructure improvements needed to support their proposed development.
			<b>5.5</b>	<b>Balancing Residential and Non-Residential Assessment</b>	The Town shall seek to manage the amount of residential land and non-residential land in its long range land use plan to be able to achieve a 70:30 split between residential and non-residential assessment upon full build out of the available land.
			<b>5.6</b>	<b>Annexation</b>	The Town shall propose periodic annexations of land from Mountain View County for residential purposes and shall seek to maintain at least a 20-year supply of land for residential uses within the Town boundaries at all times.
			<b>5.7</b>	<b>Joint Growth for Commercial and Industrial Uses</b>	The Town shall work with Mountain View County through the Growing Together framework to meet the combined needs of the Town and County for commercial and industrial lands.
<b>5.5</b>	<b>Protection of Agricultural Lands</b>	The Town shall ensure an orderly progression of development to minimize land use conflicts with and protect existing agricultural operations and land until it is required for urban development.	<b>5.8</b>	<b>Protection of Agricultural Lands</b>	<p>The Town shall ensure an orderly progression of development to minimize land use conflicts with and protect existing agricultural operations and land until it is required for urban development.</p> <p>The Town shall seek to develop at an intensity of development that minimizes the rate at which agricultural lands are converted to non-agricultural use.</p>

Current Municipal Development Plan			Proposed Municipal Development Plan		
5.6	<b>Location of Employment Opportunities</b>	The Town shall seek to reduce travel demands by assessing the potential for locating appropriate employment opportunities in or adjacent to residential areas through more detailed plans.	5.9	<b>Location of Employment Opportunities</b>	The Town shall seek to reduce travel demands by assessing the potential for locating appropriate employment opportunities in or adjacent to residential areas through more detailed area structure plans and area redevelopment plans.
5.7	<b>Redevelopment and Intensification</b>	The Town shall undertake reviews of potential redevelopment and intensification opportunities in the established areas including but not limited to the areas shown as Future Area Redevelopment Plan on the Land Use Concept Map.	5.10	<b>Redevelopment and Intensification</b>	The Town shall undertake reviews of potential redevelopment and intensification opportunities in the established areas. This may take the form of an area redevelopment plan and/or regulations set out in the Land Use Bylaw.
5.8	<b>Allocation of Costs of Growth</b>	The costs of servicing newly developing areas shall be borne by the Developer in accordance with policies approved by Council.	5.11	<b>Allocation of Costs of Growth</b>	The costs of servicing newly developing areas shall be borne by the Developer in accordance with policies approved by Council.
5.9	<b>Municipal Investment in Infrastructure and Services</b>	Any public expenditure for improvements or services proposed within this plan shall be subject to the Town's annual operating and capital budgeting process and shall be evaluated in relation to the overall needs of the community and town-wide priorities.	5.12	<b>Municipal Investment in Infrastructure and Services</b>	Any public expenditure for improvements or services proposed within this plan shall be subject to the Town's annual operating and capital budgeting process and shall be evaluated in relation to the overall needs of the community and town-wide priorities.

Current Municipal Development Plan			Proposed Municipal Development Plan		
5.10	<b>Existing Sour Gas Facilities</b>	The Town shall consult with the Alberta Utilities and Energy Board regarding the potential for new development in the vicinity of existing Sour Gas facilities and shall refer to the Board, applications for subdivision and development of land, in accordance with the Subdivision and Development Regulations as approved under the <i>Municipal Government Act</i> .	5.13	<b>Existing Sour Gas Facilities</b>	The Town shall consult with the Alberta Energy Regulator (AER) regarding the potential for new development in the vicinity of existing sour gas facilities and shall refer to the AER, applications for subdivision and development of land, in accordance with the Subdivision and Development Regulation as approved under the <i>Municipal Government Act</i> .
5.11	<b>New Sour Gas Facilities</b>	The Town shall monitor proposals for new Sour Gas and related facilities within or adjacent to the Town's existing and future growth areas and determine on a case by case basis its position regarding such facilities.	5.14	<b>New Sour Gas Facilities</b>	The Town shall monitor proposals for new sour gas and related facilities within or adjacent to the Town's existing and future growth areas and determine on a case by case basis its position regarding such facilities.
5.12	<b>New Oil and Gas Facilities</b>	The Town shall encourage oil and gas facilities and pipelines to be located beyond the identified future growth areas. Where it is not possible to avoid these areas, the Town shall encourage the use of alignments and locations that are conducive to future urban development.	5.15	<b>New Oil and Gas Facilities</b>	The Town shall encourage oil and gas facilities and pipelines to be located beyond the identified future growth areas. Where it is not possible to avoid these areas, the Town shall encourage the use of alignments and locations that are conducive to future urban development.
5.13	<b>Setback from Landfill, Wastewater and Related Facilities</b>	Subdivision and development within the area identified as development setback from the waste transfer site and wastewater treatment facilities shall only be permitted in accordance with the Subdivision and Development Regulation. The Town may request a waiver of this setback from Alberta Environment.	5.16	<b>Setback from Waste Transfer Site, Wastewater and Related Facilities</b>	Subdivision and development within the area identified as development setback from the waste transfer site and wastewater treatment facilities shall only be permitted in accordance with the Subdivision and Development Regulation. The Town may request a waiver of this setback from Alberta Environment.

Current Municipal Development Plan			Proposed Municipal Development Plan		
			<b>5.17</b>	<b>Relocation of Waste Transfer Site</b>	The Town shall encourage the Mountain View Regional Waste Authority to relocate the existing waste transfer site on 70 Avenue to remove the impact of the associated development setback from existing and future growth areas of the town.
<b>5.14</b>	<b>Development Adjacent to CPR Right-of-Way</b>	Subdivision and development of land adjacent to the CPR railway tracks shall be undertaken in a manner that mitigates the impact of rail operations on adjacent uses. The Town may require a noise study or other type of study (e.g. visual impact study, vibration study) that may, in the opinion of the Approving Authority, be considered necessary to properly evaluate subdivision and development proposals along the railway tracks.	<b>5.18</b>	<b>Development Adjacent to CPR Right-of-Way</b>	Subdivision and development of land adjacent to the CPR railway tracks shall be undertaken in a manner that mitigates the impact of rail operations on adjacent uses. The Town may require a noise study or other type of study (e.g. visual impact study, vibration study) that may, in the opinion of the Approving Authority, be considered necessary to properly evaluate subdivision and development proposals along the railway tracks.
			<b>5.19</b>	<b>Brownfield and Greyfield Redevelopment</b>	The Town shall promote the environmental remediation and repurposing of brownfield and greyfield sites within the town. As part of this effort, consideration may be given to the proposed tax incentives outlined in the Municipal Government Act.

Current Municipal Development Plan	Proposed Municipal Development Plan
<p><b>Urban Form and Design</b></p> <p><b>Goal</b></p> <p>To create an attractive, safe, functional and stimulating physical environment where residents and visitors experience a strong sense of place and community pride.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Promote high quality architecture and design in commercial, industrial, institutional and residential development.</li> <li>(b) Support and encourage innovative neighbourhood and building designs.</li> <li>(c) Ensure public spaces are designed with community safety as a priority.</li> </ul>	<p><b>Urban Form and Design</b></p> <p>Urban form refers to the physical layout and design of Olds’ urban environment. It includes issues such as location of growth, density, street patterns, major transportation routes and systems, major open space areas and employment nodes. Urban design deals with the visual quality of the built environment. High quality urban design can enhance the distinctiveness of parts of the community and promote social objectives such as creating a strong sense of place and belonging and interaction amongst community members. It creates character and interest through such elements as the design of public parks, attractive streetscapes, and the contribution of individual buildings towards creating attractive outdoor spaces. Urban design can also influence the safety of the urban environment through the establishment of highly visible and lively spaces.</p> <p><b>Goal</b></p> <p>To create an attractive, safe, functional and stimulating physical environment where residents and visitors experience a strong sense of place and community pride.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Promote high quality architecture and design in commercial, industrial, institutional and residential development.</li> <li>(b) Support and encourage innovative neighbourhood and building designs.</li> <li>(c) Ensure public spaces are designed with community safety as a priority.</li> </ul>

Current Municipal Development Plan		Proposed Municipal Development Plan	
		<p><b>6.1 Architectural Appearance and Visual Aesthetics</b></p> <p>The Town shall require a high quality of architectural appearance and visually attractive development along all major travel corridors into and through the town. Where necessary, specific requirements shall be added to the Land Use Bylaw.</p> <p>The Town shall work with Mountain View County to achieve a similar level of architecture and visually attractive development along highways leading to the town.</p>	
<p><b>6.1 Infill Development</b></p> <p>The Town shall support infill residential and commercial development on vacant or underutilized parcels of land in established neighbourhoods, provided consideration is given to:</p> <ul style="list-style-type: none"> <li>• compatibility in height, scale and design of adjacent buildings in the area;</li> <li>• continuity with nearby streetscape and lot patterns;</li> <li>• compatibility with surrounding land uses;</li> <li>• appropriate landscaping, provision of parking / loading, and preservation of existing vegetation;</li> <li>• integration and preservation of buildings considered to have historical and / or architectural significance; and</li> <li>• capacity of municipal utilities and infrastructure unless otherwise directed in an area redevelopment plan.</li> </ul>		<p><b>6.2 Infill Development</b></p> <p>The Town shall support infill residential and commercial development on vacant or underutilized parcels of land in established neighbourhoods, provided consideration is given to:</p> <ul style="list-style-type: none"> <li>• compatibility in height, scale and design of adjacent buildings in the area;</li> <li>• continuity with nearby streetscape and lot patterns;</li> <li>• compatibility with surrounding land uses;</li> <li>• appropriate landscaping, provision of parking / loading, and preservation of existing vegetation;</li> <li>• integration and preservation of buildings considered to have historical and / or architectural significance; and</li> <li>• capacity of municipal utilities and infrastructure unless otherwise directed in an area redevelopment plan.</li> </ul>	

Current Municipal Development Plan			Proposed Municipal Development Plan		
6.2	<b>Promoting a Compact Urban Form</b>	The Town should promote a compact and efficient urban form by facilitating infill development in existing residential, commercial and industrial areas, and gradually increasing the overall density of the Town.	6.3	<b>Promoting a Compact Urban Form</b>	The Town should promote a compact and efficient urban form by facilitating infill development in existing residential, commercial and industrial areas, and gradually increasing the overall density of the Town.
6.3	<b>Promoting the Development of Mixed Use Urban Villages</b>	The Town should encourage the development of urban villages in strategic locations as mixed use focal points with retail and office uses, higher density housing, schools, institutional uses and other community facilities to minimize the need for new transportation infrastructure and encourage less reliance on the private automobile.	6.4	<b>Promoting Appropriate Mixed Use</b>	The Town should encourage the development of appropriately designed mixed use areas with retail and office uses, higher density housing, schools, institutional uses and other community facilities to minimize the need for new transportation infrastructure and encourage less reliance on the private automobile.
6.4	<b>Promote Urban Design That Encourages Walkability</b>	The Town should promote urban design that encourages walkability by providing functional and attractive pedestrian linkages between adjacent neighbourhoods and the existing trails system, designing for universal accessibility, encouraging the development of active residential and commercial streetscapes, ensuring pedestrian crossings are clearly marked and by avoiding adverse microclimatic effects when designing streets, park spaces and pedestrian linkages.	6.5	<b>Promote Urban Design That Encourages Walkability</b>	The Town should promote urban design that encourages walkability by providing functional and attractive pedestrian linkages between adjacent neighbourhoods and the existing trails system, designing for universal accessibility, encouraging the development of active residential and commercial streetscapes, ensuring pedestrian crossings are clearly marked and by avoiding adverse microclimatic effects when designing streets, park spaces and pedestrian linkages.

Current Municipal Development Plan			Proposed Municipal Development Plan		
6.5	<b>Innovative Neighbourhood Designs</b>	The Town should encourage innovative neighbourhood designs that respond to economic, demographic and market conditions; that are in Olds' interest and align with the goals, objectives and policies in this Plan.	6.6	<b>Innovative Neighbourhood Designs</b>	The Town should encourage and be receptive to consideration of innovative neighbourhood designs that respond to economic, demographic and market conditions; that are in Olds' interest and align with the goals, objectives and policies in this Plan.
6.6	<b>Crime Prevention Through Environmental Design (CPTED)</b>	The Town encourages the use of Crime Prevention Through Environmental Design (CPTED) in the design of new developments to avoid the creation of areas hidden from view and isolated spaces, as well as provide clear sightlines, sufficient lighting and promote natural surveillance throughout the Town.	6.7	<b>Crime Prevention Through Environmental Design (CPTED)</b>	The Town encourages the use of Crime Prevention Through Environmental Design (CPTED) in the design of new developments to avoid the creation of areas hidden from view and isolated spaces, as well as provide clear sightlines, sufficient lighting and promote natural surveillance throughout the Town.
			6.8	<b>Fire Smart Principles</b>	The Town encourages consideration and incorporation of Fire Smart principles in the management of natural areas and lands on the perimeter of the built up area. This includes such concepts as purposefully removing or limiting materials that may fuel fires (e.g. grass fires) and put properties at risk.

The Town shall maintain the Heritage Management Plan as a strategy for ensuring Olds' heritage resources and sites are protected well into the future.

Current Municipal Development Plan	Proposed Municipal Development Plan
<p><b>Environmental Management</b></p> <p><b>Goal</b></p> <p>To preserve significant natural areas and create and maintain attractive, clean and ecologically responsible natural and built environments.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Promote environmental sustainability principles in land use planning decisions and development practices.</li> <li>(b) Recognize the value and contribution natural areas and functions make towards quality of life in an urban setting.</li> <li>(c) Conserve and sensitively incorporate natural features as an integral part of the open space system and utility system.</li> <li>(d) Support programs and initiatives that increase awareness and public involvement in environmental management and conservation.</li> </ul>	<p><b>Environmental Management</b></p> <p>Environmental management and the development of Olds as an environmentally sustainable and responsible community is a priority. Preservation of significant natural features is an important contributor to the high quality of life enjoyed by residents. Integrating these features into the open space system helps create an attractive and desirable community. It reinforces the interrelationships and linkages between urban dwellers, their surroundings and the natural systems that residents depend upon. Environmental management also entails consideration of how urban development can impact environmental systems. Efficient use of land, reduction of air pollution, protecting water quality, management and enhancement of open space natural features (natural capital), and efficient use of resources are important elements in Olds' efforts to be environmentally sustainable.</p> <p><b>Goal</b></p> <p>To preserve significant natural areas and create and maintain attractive, clean and ecologically responsible natural and built environments.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Promote environmental sustainability principles in land use planning decisions and development practices.</li> <li>(b) Recognize the value and contribution natural areas and functions make towards quality of life in an urban setting.</li> <li>(c) Conserve and sensitively incorporate natural features as an integral part of the open space system and utility system.</li> <li>(d) Support programs and initiatives that increase awareness and public involvement in environmental management and conservation.</li> </ul>

Current Municipal Development Plan			Proposed Municipal Development Plan		
9.1	<b>Regional Approach to Conservation</b>	The Town shall work with Mountain View County and other interested parties in creating and implementing a regional approach to the conservation of key natural areas and functions.	9.1	<b>Regional Approach to Conservation</b>	The Town shall work with Mountain View County and other local and regional organizations to create and implement a regional approach to the conservation of key natural areas and functions. This process should begin with an inventory of existing natural spaces within and surrounding the town.
9.2	<b>Timing of Conservation Planning and Efforts</b>	The Town shall recognize that planning and efforts to conserve natural features in and around Olds must be initiated well in advance of urban expansion or development of the surrounding lands.	9.2	<b>Timing of Conservation Planning and Efforts</b>	The Town shall recognize that planning and efforts to conserve natural features in and around Olds must be initiated well in advance of urban expansion or development of the surrounding lands. This will require conversations with the owners of features that are identified for conservation well before lands are annexed or planned in detail for urban expansion or non-agricultural use.
9.8	<b>Environmental Reserve Dedication of Lands Unsuitable for Development</b>	Through the subdivision process, the Town shall require that lands considered unsuitable for development are dedicated as environmental reserve in accordance with the provisions of the <i>Municipal Government Act</i> .	9.3	<b>Environmental Reserve Dedication of Lands Unsuitable for Development</b>	Through the subdivision process, the Town shall require that lands considered unsuitable for development (e.g. due to steep slopes or being subject to flooding or consisting of a natural drainage course) are dedicated as environmental reserve in accordance with the provisions of the <i>Municipal Government Act</i> .

Current Municipal Development Plan			Proposed Municipal Development Plan		
9.9	<b>Environmental Reserve Dedication of Lands Adjacent Water Bodies and Water Courses</b>	When lands adjacent to water bodies or water courses are subdivided, a strip of land shall be dedicated as environmental reserve to provide a buffer and provide public access. The width of the required dedication shall be established by the Subdivision Authority.	9.4	<b>Environmental Reserve Dedication of Lands Adjacent Water Bodies and Water Courses</b>	When lands adjacent to water bodies or water courses are subdivided, a strip of land shall be dedicated as environmental reserve to provide a buffer and provide public access. The width of the required dedication shall be established by the applicable area structure plan or the Subdivision Authority where there is no approved area structure plan. The minimum width of the strip of land to be required shall be 6m.
9.10	<b>Use of Environmental Reserve</b>	Lands dedicated as environmental reserve shall remain in their natural state and/or be used as part of the public trail system where necessary to ensure a continuous, integrated trail system.	9.5	<b>Use of Environmental Reserve</b>	Lands dedicated as environmental reserve shall remain in their natural state and/or be used as part of the public trail system where necessary to ensure a continuous, integrated trail system.
			9.6	<b>Environmental Reserve Easements</b>	Despite Policy 9.3 and Policy 9.4, the Town may use an environmental reserve easement in place of the dedication of an environmental reserve parcel where public access to the lands in question is not desirable.
			9.7	<b>Crown Ownership of Wetlands</b>	Where the Crown (Province) claims ownership of a wetland classified as permanent or semi-permanent under the Alberta Wetland Policy, the wetland shall be treated as a water body and environmental reserve dedication shall be provided in accordance with Policy 9.4 and Policy 9.6.

Current Municipal Development Plan	Proposed Municipal Development Plan	
	<p><b>9.8</b></p> <p><b>Environmental Reserve – Wetland Value A</b></p>	<p>The Town shall require all wetlands that are given a wetland value of A under the Alberta Wetland Policy to be dedicated as environmental reserve at the time of subdivision. Where subdivision is not proposed these wetlands shall be protected through wetlands regulations set out in the Land Use Bylaw.</p>
	<p><b>9.9</b></p> <p><b>Environmental Reserve – Wetland Value B</b></p>	<p>The Town shall require all wetlands that are given a wetland value of B under the Alberta Wetland Policy to be dedicated as environmental reserve at the time of subdivision. Where subdivision is not proposed these wetlands shall be protected through wetlands regulations set out in the Land Use Bylaw.</p> <p>The boundaries of a wetland with a wetland value of B may be modified to accommodate logical roadway, utility alignment and lot patterns.</p>
	<p><b>9.10</b></p> <p><b>Environmental Reserve – Wetland Value C and D</b></p>	<p>The Town shall not seek dedication as environmental reserve or preservation of wetlands that are given a wetland value of C or D under the Alberta Wetland Policy.</p>
	<p><b>9.11</b></p> <p><b>Compensation for Wetland Loss</b></p>	<p>The Town’s preference is that any compensation to be provided to offset the displacement of wetland area or loss of wetland value for any wetland under the Alberta Wetland Policy is provided within a 3 to 5 mile distance of the Town of Olds. The compensation area shall not be located in an area slated for future urban expansion as identified in this plan or the Intermunicipal Development Plan with Mountain View County.</p>

Current Municipal Development Plan			Proposed Municipal Development Plan		
			<b>9.12</b>	<b>Conservation Reserve – Upland Features</b>	The Town may designate lands that cannot be obtained as environmental reserve as conservation reserve where the lands contain an environmentally significant feature that the Town wishes to conserve. Candidate sites may include existing sizeable (more than 1 acre) stands of trees or areas covered in native prairie grasses or similar features. The details for each candidate site for designation as conservation reserve shall be contained in the area structure plan that applies to the site.
<b>9.3</b>	<b>Conservation Tools</b>	The Town shall investigate the possible use of such tools as land purchase, land swaps, leasing and conservation agreements or easements as a means of conserving natural features both within and in the areas surrounding Olds.	<b>9.13</b>	<b>Conservation Tools</b>	In addition to environmental reserve dedication and possible conservation reserve designation, the Town shall investigate the possible use of such tools as land purchases, land swaps, tax incentives, leasing and conservation agreements or easements and other similar mechanisms as a means of conserving natural features both within and in the areas surrounding Olds.
<b>9.5</b>	<b>Stewardship Program</b>	The Town should investigate the establishment of a stewardship program to, among other things, provide education, promote awareness and encourage residents to plant native vegetation, naturalize their property and assist in monitoring the health of the Town’s natural areas.	<b>9.14</b>	<b>Environmental Education and Awareness Initiatives</b>	The Town should investigate the establishment of a stewardship program or similar initiative to, among other things, provide education, promote awareness and encourage residents to value biodiversity, plant native vegetation, naturalize their property and assist in monitoring the health of the Town’s natural areas.

Current Municipal Development Plan			Proposed Municipal Development Plan		
			<b>9.15</b>	<b>Urban Forestry</b>	The Town shall implement an urban forestry initiative that includes an annual investment in new tree planting on public lands that are under the control of the Town. This may include landscaping and revegetation of existing open spaces and boulevards and the inclusion of trees in new open space developments.
<b>9.4</b>	<b>Green Infrastructure</b>	The Town shall incorporate existing natural features as part of the overall infrastructure systems. This may include using existing wetlands as storm water management facilities wherever possible and planting shrubs and trees to improve air quality along major roads and within industrial areas.	<b>9.16</b>	<b>Green Infrastructure</b>	The Town shall incorporate existing natural features as part of the overall infrastructure systems. This may include using existing wetlands as storm water management facilities wherever possible and planting shrubs and trees to improve air quality along major roads and within industrial areas.
			<b>9.17</b>	<b>Air Quality</b>	The Town shall promote efforts to improve air quality and may work with other stakeholders to monitor air quality and establish outreach and awareness programs that promote improved air quality.
<b>9.6</b>	<b>Green Buildings</b>	The Town shall encourage developers and builders to follow the voluntary LEED™ green building rating system administered by the Canadian Green Building Council or follow sustainable building practices compatible with LEED™ standards. Sustainable building practices include: <ul style="list-style-type: none"> <li>• Minimizing storm water volumes through the installation of roof top gardens or on-site cisterns;</li> <li>• Installing water saving plumbing fixtures;</li> </ul>	<b>9.18</b>	<b>Green Buildings</b>	The Town shall encourage developers and builders to follow the voluntary LEED™ green building rating system administered by the Canadian Green Building Council or follow sustainable building practices compatible with LEED™ standards. <p><b>Transportation</b></p> <p><b>Goals</b></p> <p>To provide for the safe and efficient movement of people and goods within and through Olds by coordinating the planning of land use and transportation systems.</p> <p>To encourage the use of non-motorized modes of transportation.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Ensure the coordination and construction of safe and efficient roads, bicycling and pedestrian facilities.</li> <li>(b) Seek opportunities to reduce travel demands and promote alternatives to the private automobile.</li> <li>(c) Coordinate the planning and construction of transportation facilities within the Town with the Provincial and County authorities responsible for connecting routes outside of and through the town.</li> <li>(d) Promote the development and enhancement of regional transportation facilities.</li> </ul>	<p><b>Transportation</b></p> <p>Facilities related to travel within, and through, Olds occupy a considerable amount of land and represent a significant investment of public resources. Ensuring the efficient movement of people and goods to and between various parts of the community is a key planning consideration. It is important to recognize and seek balance between the implications that land use patterns have on transportation needs and vice versa. Equally important is the fact that personal mobility takes many forms and a diverse range of transportation modes needs to be considered. This includes use of private vehicles, cycling, walking and, eventually, public transit. In planning for growth and change in Olds for the long term, appropriate attention must be paid to the provision of facilities for all these modes of transportation.</p> <p><b>Goal</b></p> <p>To provide for the safe and efficient movement of people and goods within and through Olds by coordinating the planning of land use and transportation systems and encouraging the use of non-motorized modes of transportation.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Ensure the coordination and construction of safe and efficient roads, bicycling and pedestrian facilities.</li> <li>(b) Seek opportunities to reduce travel demands and promote alternatives to the private automobile.</li> <li>(c) Coordinate the planning and construction of transportation facilities within the Town with the Provincial and County authorities responsible for connecting routes outside of and through the town.</li> <li>(d) Promote the development and enhancement of regional transportation facilities.</li> </ul>

Current Municipal Development Plan			Proposed Municipal Development Plan		
16.1	<b>Coordination of Land Use and Transportation</b>	The Town shall coordinate transportation and land use plans with the objective of reducing the demand for travel particularly by private automobile.	16.1	<b>Coordination of Land Use and Transportation</b>	The Town shall coordinate transportation and land use plans with the objective of reducing the demand for travel particularly by private automobile.
16.2	<b>Overall Transportation Plan</b>	The Town shall prepare an overall transportation plan for Olds incorporating policies, standards and proposals related to the movement of private and commercial vehicles, bicycling and walking.	16.2	<b>Transportation Master Plan</b>	<p>The Town shall implement the recommendations of the Transportation Master Plan and shall periodically update the Plan's policies, standards and proposals related to the movement of private and commercial vehicles, future public transit, bicycling and walking.</p> <p>Where there is a conflict between the recommendations of the Transportation Master Plan and an approved statutory plan, or a decision is made to accept an alternative solution through the adoption of a statutory plan, the policy and direction of the statutory plan prevails.</p>
16.3	<b>Utilization of Available Infrastructure Capacity</b>	The Town shall coordinate the planning and construction of transportation infrastructure and development, so as to maximize the utilization of available and planned transportation capacity.	16.3	<b>Utilization of Available Infrastructure Capacity</b>	The Town shall coordinate the planning and construction of transportation infrastructure and development, so as to maximize the utilization of available and planned transportation capacity.
16.4	<b>Coordination of Community Connections</b>	The Town shall coordinate the provision of road, transit and pathway connections between and through communities in the local area planning process.	16.4	<b>Coordination of Community Connections</b>	<p>The Town shall coordinate the provision of road, transit and pathway connections between and through existing and future communities in the area structure planning process. This includes such items as:</p> <ul style="list-style-type: none"> <li>• collector road connections and patterns that facilitate movement within neighbourhoods without reliance on the arterial road system (e.g. school drop offs);</li> </ul>

Current Municipal Development Plan			Proposed Municipal Development Plan		
					<ul style="list-style-type: none"> <li>• collector road patterns that facilitate the future provision of a public transit system as the community grows (e.g. routing that reaches as many houses as possible); and</li> <li>• trails and paths that link to facilities within and beyond the community (e.g. able to bicycle to the dog park).</li> </ul>
16.5	<b>Transportation Needs in Industrial and Commercial Areas</b>	The Town shall ensure the provision of appropriate transportation facilities in commercial and industrial areas, to accommodate both the movement of truck traffic and the travel needs of employees and customers.	16.5	<b>Transportation Needs in Industrial and Commercial Areas</b>	The Town shall ensure the provision of appropriate transportation facilities in commercial and industrial areas, to accommodate both the movement of truck traffic and the travel needs of employees and customers.
16.6	<b>Mitigation of Undesirable Impacts</b>	The Town shall endeavour to mitigate undesirable community, social, environmental and noise impacts in the planning, construction and operation of transportation facilities.	16.6	<b>Mitigation of Undesirable Impacts</b>	<p>The Town shall endeavour to mitigate undesirable community, social, environmental and noise impacts in the planning, construction and operation of transportation facilities. Efforts to achieve this may include:</p> <ul style="list-style-type: none"> <li>• distance separation through increased lot depth and/or buffer spaces;</li> <li>• physical barriers such as berms, fences, or sound walls;</li> <li>• locating more noise resilient uses and building forms such as commercial along major roadways; or</li> <li>• use of traffic calming techniques.</li> </ul>

17.1	<b>Quality of Utility Services</b>	The Town shall provide high quality utility services to residents and businesses in Olds.	17.1	<b>Quality of Utility Services</b>	The Town shall provide high quality utility services to residents and businesses in Olds. To this end, the Town shall establish and maintain standards and specifications for the construction of infrastructure based on: <ul style="list-style-type: none"> <li>• Accepted engineering practice and local experience;</li> <li>• Compliance with relevant Federal and Provincial requirements;</li> <li>• Compatibility with current industry materials and construction methods; and</li> <li>• Adaptability to future upgrades and maintenance requirements.</li> </ul>
			17.2	<b>Timing of Utility Provision</b>	The Town shall provide or facilitate the provision of utility services as development of growth areas occurs and in advance of anticipated development and population increases.
17.2	<b>Utility Infrastructure Funding</b>	The Town shall maintain, fund and implement a comprehensive long-term plan for utility infrastructure and establish budget priorities based on the premise that investment in infrastructure maintenance is a necessary annual investment rather than a discretionary cost.	17.3	<b>Utility Master Plan and Infrastructure Funding</b>	The Town shall maintain, fund and implement a comprehensive long-term master plan for utility infrastructure and establish budget priorities based on the premise that investment in infrastructure maintenance is a necessary annual investment rather than a discretionary cost.
17.3	<b>Utility Improvements</b>	The Town shall investigate opportunities and technologies that provide cost effective improvements in the efficiency and/or environmental impacts of the provision of utility services.	17.4	<b>Utility Improvements</b>	The Town shall investigate opportunities and technologies that provide cost effective improvements in the efficiency and/or environmental impacts of the provision of utility services.

Current Municipal Development Plan			Proposed Municipal Development Plan		
17.4	<b>Recycling and Energy Efficiency</b>	The Town shall promote the principles of reducing, reusing and recycling materials and efficient use of energy by Town departments, businesses and residents.	17.5	<b>Solid Waste Reduction, Recycling and Energy Efficiency</b>	The Town shall promote the principles of reduce, reuse and recycle materials and the efficient use of energy by Town departments, businesses and residents.
17.5	<b>Relocation of Waste Transfer and Wastewater Treatment Facilities</b>	The Town shall plan for and work towards the relocation of the waste transfer station and wastewater treatment facilities which are currently located in the NW 6-33-1-5.	17.6	<b>De-commissioning of Wastewater Treatment Facilities</b>	The Town shall work to obtain formal de-commissioning of the wastewater treatment plant facilities in the NW 6 to remove the impact of the setback requirement on adjacent lands and repurpose the site.
17.6	<b>Broadband Telecommunications</b>	The Town shall require the installation of infrastructure and facilities related to broadband telecommunication services in all new developing areas and major redevelopment areas.	17.7	<b>Broadband Network</b>	The Town shall require the installation of infrastructure and facilities related to broadband telecommunication services in all new developing areas and major redevelopment areas.
			17.8	<b>Storm Water Management</b>	The Town shall make provisions for storm water management throughout all new development areas. Best management practices, such as the integration of existing water bodies and natural areas into storm water management ponds, shall be pursued. The release of storm water downstream to a recognized receiving water body or water course shall be protected through utility right(s) of way in the name of the Town.
			17.9	<b>Water Conservation</b>	The Town shall encourage water conservation by managing demand by users where possible and through public awareness campaigns.

Current Municipal Development Plan	Proposed Municipal Development Plan
<p><b>Intermunicipal Planning and Regional Cooperation</b></p> <p><b>Goal</b></p> <p>To cooperate with municipalities and other government agencies to achieve mutual objectives that benefit residents and businesses in Olds and help to secure the Town’s long-term growth.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Work with Mountain View County to ensure orderly development practices, issue resolution and appropriate management and control of future growth areas in the areas adjacent to the Town/County boundary.</li> <li>(b) Work with the Government of Alberta, its agencies and other municipalities, in the provision of programs and services that benefit residents and businesses in the region.</li> <li>(c) Consolidate Olds’ position as an urban service centre in Central Alberta and a growth centre in the Calgary/Edmonton corridor.</li> </ul>	<p><b>Intermunicipal Planning and Regional Cooperation</b></p> <p>It is important to recognize that Olds is part of a region and that many issues and factors that can impact the community, its economic vibrancy and the quality of life of its citizens occur beyond and transcend the town boundaries. It is for this reason that the Province encourages and expects cooperation between municipalities, provincial departments and other agencies to address planning issues. For many years, Olds and its partners have worked through the Municipal Area Partnership to provide services to the area in a coordinated manner. Further, the “Growing Together” framework will result in more direct involvement and sharing of growth management goals and responsibilities between the Town of Olds and Mountain View County.</p> <p><b>Goal</b></p> <p>To cooperate with municipalities and other government agencies to achieve mutual objectives that benefits residents and businesses in Olds and help to secure the Town’s long-term growth.</p> <p><b>Objectives</b></p> <ul style="list-style-type: none"> <li>(a) Work with Mountain View County to ensure orderly development practices, issue resolution and appropriate management and control of future growth areas in the areas adjacent to the Town/County boundary.</li> <li>(b) Work with the Government of Alberta, its agencies and other municipalities, in the provision of programs and services that benefit residents and businesses in the region.</li> <li>(c) Consolidate Olds’ position as an urban service centre in Central Alberta and a growth centre in the Calgary/Edmonton corridor.</li> </ul>

**Current Municipal Development Plan**

**18.3 Intermunicipal Development Plan**

The Town shall work with Mountain View County to prepare an Intermunicipal Development Plan addressing the following:

- Policies that guide land use and economic development to the benefit of the Town and County;
- Direction for the coordination of roads and utilities;
- Process to accommodate timely and strategic annexations to facilitate Town growth;
- Process for ongoing consultation and discussion of planning issues and issues of mutual concern.

**Proposed Municipal Development Plan**

**18.1 Intermunicipal Development Plan**

The Town shall maintain an Intermunicipal Development Plan with Mountain View County and the Plan shall address:

- Future land use within the area that the Plan covers;
- The manner in which proposals for future development in the area will be addressed including the process to refer planning matters, plans and applications between the two municipalities;
- Co-ordination of transportation systems and municipal utilities and proposals for the financing and programming of intermunicipal infrastructure;
- Co-ordination of intermunicipal programs relating to the physical, social and economic development of the area and provision of intermunicipal services and facilities consistent with the agreed upon intermunicipal collaboration framework;
- Co-ordination of environmental matters within the area;
- Process to consider annexation proposals needed to facilitate Town growth;
- Processes for ongoing consultation and discussion of planning issues and issues of mutual concern, including a process to resolve points of interpretation and disagreement; and
- Processes relating to the administration of the Plan including the process to consider amendments or repeal.

Current Municipal Development Plan			Proposed Municipal Development Plan
18.1	<b>Referrals to Mountain View County</b>	The Town shall refer to Mountain View County for comment, prior to a decision, all proposed statutory plans and plan amendments, outline plans and amendments, Land Use Bylaw amendments, subdivision applications and major development permit applications involving lands located adjacent the Town boundary.	
18.2	<b>Referrals from Mountain View County</b>	The Town shall encourage Mountain View County to consult with the Town prior to a decision in regards to proposed statutory plans and amendments, outline plans and amendments, Land Use Bylaw amendments, subdivision applications, and major development permit applications involving lands located within 1.6 kilometers (1 mile) of the Town boundary. The Town may agree to a different referral area in one or more directions with the County through mutual agreement or an adopted Intermunicipal Development Plan.	

Current Municipal Development Plan		Proposed Municipal Development Plan
<b>18.4</b>	<b>Intermunicipal Issue Resolution</b>	<p>Until such time as an Intermunicipal Development Plan has been prepared and in those instances where, notwithstanding good efforts on both sides to the contrary, disputes on specific issues arise, the Town shall endeavour to resolve such disputes firstly through further dialogue and secondly through a meeting between the parties. Failing that, the Town shall seek to resolve the issue through mediation or other alternative dispute resolution measures. As a last resort, the Town shall seek resolution through proceedings before the Municipal Government Board or the Courts as circumstances may dictate.</p>
<b>18.5</b>	<b>Annexation</b>	<p>The Town shall promote the annexation of lands from Mountain View County in a manner that:</p> <ul style="list-style-type: none"> <li>• Supports the fiscal, environmental and social sustainability of both municipalities; and</li> <li>• Provides the Town with at least a 20-year supply of land for residential, industrial and commercial uses within the Town boundaries at all times.</li> </ul>

Current Municipal Development Plan			Proposed Municipal Development Plan		
18.6	<b>Edmonton/Calgary Corridor</b>	<p>The Town shall work with the Provincial Government and other municipalities in the Edmonton/Calgary corridor to:</p> <ul style="list-style-type: none"> <li>• Ensure a coordinated approach to growth in the corridor;</li> <li>• Ensure the provision of adequate infrastructure to support growth in the corridor; and</li> <li>• Implement the recommendations of the Central Alberta Highways 2/2A Corridor Design Study dealing with the appearance of development along major highways.</li> </ul>	18.2	<b>Edmonton/Calgary Corridor</b>	<p>The Town shall work with the Provincial Government, other municipalities and interested community organizations in the Edmonton/Calgary corridor to:</p> <ul style="list-style-type: none"> <li>• Ensure a coordinated approach to growth in the corridor;</li> <li>• Ensure the provision of adequate infrastructure to support growth in the corridor; and</li> <li>• Implement the recommendations of the Central Alberta Highways 2/2A Corridor Design Study dealing with the appearance of development along major highways.</li> </ul>
18.7	<b>Watershed Protection</b>	<p>The Town shall cooperate with all municipalities within the watershed of the Red Deer River in the establishment of a regional watershed committee. One purpose of the committee should be to provide comment and input on any actions and decisions of the Provincial and Federal Governments which may impact on the region's watershed and water supply.</p>	18.3	<b>Watershed Protection</b>	<p>The Town shall cooperate with all municipalities within the watershed of the Red Deer River in the establishment of a regional watershed committee. 	<p><b>19.10 Relation to Town Funding and Budgeting Process</b></p> <p>Various policies in this Plan suggest spending by the Town in order to achieve its successful implementation. Pursuant to the Municipal Government Act, it is not the intention of this Plan to commit Town Council to funding decisions. The funding of any proposals of this Plan shall be considered on an annual basis during the Town's budget process along with all other funding requests and priorities.</p>
	<p><b>Glossary of Terms</b></p> <p>The definitions provided below are for use in understanding the concepts and ideas discussed in the context of the Municipal Development Plan. Where a definition listed below is different than the one provided in the Land Use Bylaw, the Land Use Bylaw definition shall be used in processing a development or subdivision application.</p> <p><b>Adaptive Reuse</b> is a process whereby buildings are adapted for new uses, while retaining their original architectural features.</p> <p><b>Affordable Housing</b> refers to dwelling units that are designed to be both adequate in meeting the size and safety needs of individuals and families, and affordable to households with income at or below the community's median income, without spending more than 30% of their income on housing.</p> <p><b>Highway Commercial</b> refers to commercial areas intended for trade and service(s) related to automotive transportation and the automobile traveler, and other commercial land uses which are built at low densities, in planned centres, generally to serve the host community</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
	<p>and the region as a whole.</p> <p><b>Area Redevelopment Plan (ARP)</b> is a plan adopted as an area redevelopment plan pursuant to the Municipal Government Act, which provides a framework for future development in an already developed area.</p> <p><b>Area Structure Plan (ASP)</b> is a plan adopted as an area structure plan pursuant to the Municipal Government Act, which provides a framework for future subdivision and development in an area.</p> <p><b>Biodiversity</b> is the variety of life and its processes; and it includes the variety of living organisms, the genetic differences among them, and the communities and ecosystems in which they occur. Diversity is the key to ensuring the continuance of life on Earth. It is also a fundamental requirement for adaptation and survival and continued evolution of species.</p> <p><b>Brownfield Site</b> is a site that is the result of industrial activities such as railroads, gas stations, oil refineries, truck terminals, wood treatment facilities, dry cleaners, liquid/chemical storage facilities, steel and heavy manufacturing plants, etc. Often these sites are contaminated and require remediation before redevelopment can occur.</p> <p><b>Community Economic Development</b> refers to a community-based and community-directed process that explicitly combines social and economic development to foster the economic, social, ecological and cultural well-being of communities on a sustainable and inclusive basis.</p> <p><b>Conservation Agreement or Easement</b> is an agreement registered against title whereby a landowner grants to another person or organization rights related to the protection, conservation and enhancement of the environment, including the protection, conversation and enhancement of biological diversity and items of natural scenic or aesthetic value. A conservation agreement may provide for recreational use, open space use, environmental education use, and research and scientific studies of natural ecosystems.</p> <p><b>Eco-industrial Park</b> refers to a type of industrial park in which businesses cooperate with</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
	<p>one another and the local community in an attempt to reduce waste, efficiently share resources (such as information, materials, water, energy, infrastructure and natural resources), and produce sustainable development, with the intention of increasing economic gains and improving environmental quality.</p> <p><b>Ecological Footprint</b> is a measure of the "load" imposed by a given population on nature. It represents the land area necessary to sustain current levels of resource consumption and waste discharge by that population.</p> <p><b>Economic Development</b> refers to creating a positive environment from which local businesses can succeed and grow, and attracting new enterprises to the community.</p> <p><b>Emergency Services</b> public organizations that respond to emergencies when they occur, specifically ambulance and fire services.</p> <p><b>Environmental Reserve</b> is land that is dedicated (given) to a municipality, during the subdivision process, because it is considered undevelopable for environmental reasons in accordance with Section 664 of the Municipal Government Act. This may include areas such as wetlands, ravines, drainage courses, steep slopes, etc.</p> <p><b>Environmental Reserve Easement</b> is a legal agreement registered with Land Titles in favour of the municipality for lands that would be normally taken as environmental reserve in accordance to Section 664 of the Municipal Government Act. It requires the land to remain in its natural state but continues to be owned by a private landowner.</p> <p><b>Environmentally Sensitive Area</b> means an undisturbed or relatively undisturbed site, which because of its natural features, has value to society and ecosystems worth preserving.</p> <p><b>Geographic Information System (GIS)</b> is a system allowing for the visualization, analysis, use and presentation of location related data and geographic information.</p> <p><b>Goal</b> refers to an idealized end towards which planned action is directed and which provides an indication of what is to be achieved.</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
	<p><b>Greenfield</b> is undeveloped land used for agriculture or left in a natural state.</p> <p><b>Green Infrastructure</b> refers to a strategic approach to conservation that addresses the ecological, social and economic impacts of sprawl and the accelerated consumption and fragmentation of open land. It is the network of natural lands, open space, waterways, and smart growth design measures that form the framework for healthy and sustainable communities. With a green infrastructure in place, communities can protect native species and ecological processes, maintain clean air and water, reduce habitat fragmentation, pollution, and other threats to biodiversity, and improve the health and quality of life for people.</p> <p><b>Greyfield Sites</b> are older, economically obsolete commercial areas, often characterized by a large expanse dedicated to surface parking.</p> <p><b>Growth Management</b> is the process of directing or guiding development in a manner that is consistent with the vision, guiding principles, goals, objectives and policies contained in this MDP.</p> <p><b>Growth Strategy</b> refers to a document that establishes high level policy direction for the long term (50+ years) growth of the community.</p> <p><b>Growth Study</b> refers to a document that evaluates the supply of developable land relative to demand in the 5-30 year time frame and establishes approaches to issues such as annexation of land, timing of major utility extensions etc.</p> <p><b>Heritage Conservation</b> refers to actions or processes that are aimed at safeguarding the character-defining elements of a cultural resource so as to retain its heritage value and extend its physical life. This may involve preservation, rehabilitation, restoration or a combination of these actions or processes.</p> <p><b>Inclusive Communities</b> refers to both a process and a goal; inclusion is the ability to participate effectively in economic, social, political and cultural life of society. It is about having what is needed materially and socially to live comfortably. An inclusive community is one that creates and celebrates the opportunity for full participation for all citizens.</p>

	<p><b>Infill Development</b> occurs in mature or built up areas on vacant or underutilized lands, behind or between existing development, and which is comparable with the characteristics of surrounding development.</p> <p><b>Infrastructure</b> refers to systems and facilities (e.g. roads, sanitary sewers, water treatment and distribution networks, power lines, and telephone and cable TV systems) that service urban development.</p> <p><b>Intermunicipal Collaboration Framework</b> is a document describing how two or more municipalities work together to provide desired services to residents, ratepayer and properties.</p> <p><b>Intermunicipal Development Plan (IDP)</b> is a plan adopted by two or more councils, pursuant to the Municipal Government Act, which is an overall policy guide for the coordination of land use planning matters between the municipalities.</p> <p><b>Joint Use Site</b> means a site that houses multiple, but complimentary facilities such as a school, library and recreation centre. Parking and other associated uses can be shared in order to use land efficiently. Facilities may be housed under one roof or in separate buildings.</p> <p><b>Land Use Bylaw (LUB)</b> refers to the bylaw that divides the town into land use districts and establishes procedures for processing and deciding upon development applications. It sets out rules that affect how each parcel of land can be used and developed and includes a zoning or district map.</p> <p><b>Mixed Use</b> refers to a combination of different land uses, such as, but not limited to, residential, office commercial, retail commercial, public or entertainment, which are horizontally integrated (i.e. uses located on the same site beside one another) and/or vertically integrated (i.e. uses located on different floors in the same building) within a single compact form of urban development. The mixes of uses are to be compatible, mutually beneficial, and integrated into the community, for example, live/work in the same complex. Mixed use also relates to a range of dwelling types that could provide residences to a diversity of living arrangements and incomes.</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
	<p><b>Municipal Development Plan (MDP)</b> is a plan adopted by Council, pursuant to the Municipal Government Act, which is an overall policy guide to a municipality's future growth and development.</p> <p><b>Municipal Government Act (MGA)</b> is Provincial legislation which outlines the power and obligations of a municipality. Part 17 of the MGA provides the means by which plans and bylaws may be adopted to guide development and the use of land and buildings.</p> <p><b>Natural Capital</b> is an extension of the economic notion of capital (manufactured means of production) to environmental 'goods and services'. It refers to a stock (e.g., a forest) which produces a flow of goods (e.g., new trees) and services (e.g., carbon removal, erosion control, and habitat).</p> <p><b>Neighbourhood</b> means a mainly residential area designed as a comprehensively planned unit containing a variety of housing types, community services, recreation and culture amenities and parks necessary to meet the needs of the neighbourhood population.</p> <p><b>Objective</b> refers to directional statements that are usually phrased in measurable terms for given time frames.</p> <p><b>Oil or Gas Development</b> refers to active, suspended, and abandoned wells, pipelines, and processing facilities. It may also include rail and road use for oil or gas development.</p> <p><b>Policy</b> means a statement identifying a specific course of action for achieving objectives.</p> <p><b>Protective Services</b> provision of services to ensure the security of persons and property.</p> <p><b>Reserve</b> means land provided, as part of a subdivision, by the developer without compensation for park and school purposes in accordance with the provisions of the Municipal Government Act. This includes lands dedicated as municipal reserve (MR), school reserve (SR) and municipal and school reserve (MSR).</p> <p><b>Smart Growth</b> refers to a collection of land use and development principles that aim to enhance our quality of life, preserve the natural environment, and save resources over time. These principles ensure that growth is fiscally, environmentally and socially responsible and recognize the connections between development and quality of life. Smart growth enhances</p>

Current Municipal Development Plan	Proposed Municipal Development Plan
	<p>and completes communities by placing priority on infill, redevelopment, and densification strategies.</p> <p><b>Sustainable Development</b> means development that meets the needs of today without compromising the ability of future generations to meet their own needs. This means the community needs to sustain its quality of life and accommodate growth and change by harmonizing long-term economic, environmental and social needs. It also requires that development respects and enhances the cultural capital of the community in terms of its traditions, values, heritage, sense of place, arts, diversity and social history.</p> <p><b>Traffic Demand Management (TDM)</b> refers to strategies aimed at reducing the number of vehicle trips, shortening trip lengths, and changing the timing of trips so that they occur outside of peak hours. These strategies include use of public transit, car pools, bicycling and walking and typically focus on home-to-work trips.</p> <p><b>Urban Design</b> refers to planning and architecture that contributes to the creation of attractive spaces by having regard to design elements such as building form and style, views and vistas, open space, and streetscape treatments, which provide an urban context that is both functional and aesthetically pleasing.</p> <p><b>Urban Forestry</b> is the practice of maintaining a viable and healthy urban forest for the health, environmental and economic benefits of the community. These benefits include better air quality, cooling and shade, aesthetics, noise buffering and wildlife habitat.</p> <p><b>Urban Form</b> refers to the design and layout of our urban built environment and includes considerations such as density, street layout, transportation, centres of employment, and urban design.</p>
